  - (4) Alignment -- horizontal and vertical process alignment
  - (5) Covenant Leadership -- taking care of ship and crew

INSPECTION PROGRAM

- Attention is given to five focus areas:
  - (1) Readiness -- warfighter support and deployment readiness- ODR
  - (2) Optimization -- delivering healthcare effectively and efficiently- DHI
  - (3) Integration -- maximizing partnerships Res
  - (4) Alignment -- horizontal and vertical process alignment
  - (5) Covenant Leadership -- taking care of ship and crew

Military Health System — Measures for Success

THE ASSISTANT SECRETARY OF DEFENSE

A set of performance measures aligned with our strategic priorities.

Each of our measures provides important and regularly scheduled assessments of our system performance — in medical readiness, health care quality, efficient use of resources, and customer satisfaction.

- ***Individual Medical Readiness.***
- ***Satisfaction with Telephone Access.***
- ***Satisfaction with the Health Plan.***

Military Health System — Measures for Success

- ***Individual Medical Readiness.***
  - **Dental readiness. All Services use the same classification system to assess and monitor dental readiness.**
  - **The IMR of each Service member will be assessed according to the following system:**
    - **Fully medically ready = current in all categories including dental class 1 or 2.**
    - **Partially medically ready = lacking only immunizations, readiness laboratory studies, or medical equipment.**
    - **Not medically ready = deployment limiting condition (including those hospitalized or convalescing from serious illness or injury), or dental class 3.**
    - **Medical readiness indeterminate = inability to determine health status because of missing health record, overdue periodic health assessment or dental class 4.**
